Die in diesem Produktdatenblatt genannten Spezifikationen dienen nur zur Produktbeschreibung und beziehen sich auf den Zeitpunkt unmittelbar nach der Produktion bzw. Import des Produktes. Sie entsprechen den Angaben des Herstellers. Eine rechtsverbindliche Zusicherung bestimmter Eigenschaften oder der Eignung für einen bestimmten Einsatzzweck kann hieraus nicht abgeleitet werden. Durch unsachgemäßen Transport und / oder unsachgemäße Lagerung können sich Änderungen ergeben. Die Angaben in diesem Produktdatenblatt entbinden den Verarbeiter nicht von eigener Prüfung der Eigenschaften des Produktes und dessen Eignung für die vorgesehene Verwendung.

Lascaux Impasto Gel 2 matt

Impasto gels are thick gels used to create heavy impasto textures and to give colours more body and volume. They may be used alone, mixed with, or painted over with acrylic colours to impart different sheens and textures to colours. Impasto Gels are flexible and will not crack even when applied in thick layers. They have excellent adhesive properties.

Composition

Pure acrylic resin emulsion

Properties

- thinnable with water
- dries to a waterproof and crystal-clear film
- becomes viscous-elastic and flexible
- lightfast and age-resistant

Applications

- painting mediums for acrylic colours
- to create transparent and pasty colour applications
- added to Lascaux Studio Acrylic colours it increases pastosity (also for the creation of heavy impastos)
- can be added in any proportion to Lascaux Artist Acrylic colours without changing viscosity and texture of the Artist Acrylic colours
- Impasto Gels prolong the drying of acrylics according to the amount added
- Impasto Gels are particularly suitable as adhesives for collages and for embedding a variety of materials. They can also be combined with pigments, earth, sand and other granular substances
- use as a final texture varnish for interior (Impasto Gel 1 gloss is particularly suitable for colourless textural final varnishes for art prints etc.)

Directions

Interesting textural effects can be achieved with a brush or palette knife when used undiluted or mixed with a bit of colour. Diluted with water, Impasto Gel forms a viscous film.

Very thick colourless layers (above 5 mm / 1/5 in.) may take several days to dry completely.

Depending on the amount of Impasto Gel 1 gloss added, the colours become more brilliant and transparent as well as glossier.

Impasto Gel 2 matt and Impasto Gel 1t are being used in the same way, however transparency and gloss level decrease the higher the matt level.

Gloss levels can be individually adjusted by mixing the two products as desired.

Lascaux Impasto Gel should not be used below the temperature of +8°C (+46°F).

Notes

USA: conforms to ASTM D-4236.

Sizes

Art. Nr. 2011085: 85ml

Art. Nr. 2011100: 1l

Art. Nr. 2011500: 5l.
